car: Car parts

[accelerator](#) a device for increasing speed, esp a pedal for controlling the fuel intake in a motor vehicle; throttle
[air bag](#) a safety device in a car, consisting of a bag that inflates automatically in an accident and prevents the passengers from being thrown forwards
[alternator](#)[ammeter](#)[anti-roll bar](#) a crosswise rubber-mounted bar in the suspension of a motor vehicle, which counteracts the movement downward on one side when cornering
[axle](#) a bar or shaft on which a wheel, pair of wheels, or other rotating member revolves
[battery](#)[bearing](#) a support, guide, or locating piece for a rotating or reciprocating mechanical part
[big end](#) the larger end of a connecting rod in an internal-combustion engine
[bonnet](#) the hinged metal part of a motor vehicle body that provides access to the engine, or to the luggage space in a rear-engined vehicle
[boot](#) an enclosed compartment of a car for holding luggage, etc, usually at the rear
[brake](#) a device for slowing or stopping a vehicle, wheel, shaft, etc, or for keeping it stationary, esp by means of friction
[brake light](#) a red light attached to the rear of a motor vehicle that lights up

when the brakes are applied, serving as a warning to following drivers [brake pad](#) the flat metal casting, together with the bound friction material, in a disc brake [bucket seat](#) a seat in a car, aircraft, etc, having curved sides that partially enclose and support the body [bumper](#) a horizontal metal bar attached to the front or rear end of a car, lorry, etc, to protect against damage from impact [camshaft](#) a shaft having one or more cams attached to it, esp one used to operate the valves of an internal-combustion engine [carburettor](#) a device used in petrol engines for atomizing the petrol, controlling its mixture with air, and regulating the intake of the air-petrol mixture into the

[ra](#) a device using three-way catalysts to reduce the obnoxious and poisonous components (mainly oxides of nitrogen, carbon monoxide, and unburnt hydrocarbons) from vehicles [chassis](#) the steel frame, wheels, engine, and mechanical parts of a motor vehicle, a childproof lock [choke](#) a device in the carburettor of a petrol engine that enriches the air supply [clutch](#) a device that enables two revolving shafts to be joined or, esp one that transmits the drive from the engine to the gearbox in a vehicle [coil](#) the engine that supplies the high voltage to the sparking plugs [connecting rod](#) a rod or bar for one that connects a rotating part to a reciprocating part [cowl](#) the part of a car body that and the bonnet [crank](#) a handle incorporating a crank, used to start an engine or motor [crankshaft](#) a shaft having one or more cranks, esp the main shaft of an internal-combustion engine, which the connecting rods are attached [cylinder](#) the chamber in a reciprocating internal-combustion engine, or compressor within which the piston moves [cylinder head](#) the detachable metal top of a cylinder block. In an engine it contains part of the combustion chamber and in a two-stroke engine it houses the valves and their operating mechanisms [dashboard](#) the dashboard of a boat, or aircraft [demister](#) a device incorporating a heater and/or blower used in a motor vehicle to prevent fogging of the windshield [dipstick](#) [disc brake](#) [distributor](#) the device in a petrol engine that supplies the high voltage to the sparking plugs in the sequence of the firing order [distributor cap](#) the distributor cap that holds in place the wires from the distributor to the sparking plugs [door](#) [drive shaft](#) parts of an engine through which the exhausted gases or steam pass [fan](#) [fan belt](#) any belt or drive belt that drives a cooling fan together with a dynamo or alternator in a car engine [fascia](#) the name for dashboard [fender](#) (U.S., Canadian) the part of a car body that surrounds the wheel [fog light](#) a light for use in foggy conditions, usually positioned low down on the front or rear of a vehicle [gasket](#) [gear](#) a mechanism for transmitting motion by gears, esp for a specific purpose within which a train of gears is sealed [gear lever or \(U.S. & Canad.\) gearshift](#) the lever or handle by which any of a number of sets of transmission gears to a motor, etc. [glove compartment](#) a compartment in a car dashboard for the storage of miscellaneous articles [grille or radiator grille](#) a grating, or grille, that admits cooling air to the radiator of a motor vehicle [handbrake](#) a brake operated by the hand [headlight](#) a powerful light, equipped with a reflector and attached to the front of a vehicle, esp a motor vehicle, for illuminating the way [headrest](#) a support for the head, as on a dentist's chair or car seat [hood](#) the hood of a motor vehicle [horn](#) a device for producing a warning or signalling noise [hubcap](#) a metal cap or wheel, esp a stainless steel or chromium-plated one [ignition](#) the process of igniting the fuel in an internal-combustion engine [indicator](#) a device for indicating that a motor vehicle is about to turn left or right, esp two pairs of lights that flash when operated or a pair of trafficators [jack](#) a mechanical or hydraulic device for exerting a large force, esp to raise a heavy weight such as a motor vehicle [little end](#) the smaller end of a connecting rod in an internal-combustion engine or reciprocating pump [lock](#) a similar device attached to a machine, vehicle, etc, to prevent use by unauthorized persons [luggage rack](#) [manifold](#) a chamber or pipe with a number of inlets or outlets used to collect or distribute a fluid. In an internal-combustion engine the inlet manifold carries the vaporized fuel from the carburettor to the inlet ports and the exhaust manifold carries the exhaust gases away [mileometer, milometer, or \(U.S. & Canad.\) odometer](#) [mud flap](#) a flap on a car, truck etc, to protect the vehicle from mud and debris [numberplate](#) a plate mounted on the front and back of a motor vehicle bearing the registration number [oil filter](#) a filter that removes impurities from engine oil [oil-pressure gauge](#) [oil pump](#) [parcel shelf](#) a shelf (which is usually removable) inside a car, located behind the back seats, and used to store small items [parking light](#) [pedal](#) any foot-operated lever or other device, esp one of the two levers that drive the chain wheel of a bicycle, the foot brake, clutch control, or accelerator of a car [petrol cap](#) [petrol gauge](#) a gauge that indicates the amount of petrol left in the tank of a vehicle [petrol tank](#) a tank for holding petrol to supply a vehicle [piston](#) a disc or cylindrical part that slides to and fro in a hollow cylinder. In an internal-combustion engine it is forced to move by the expanding gases in the cylinder head and is attached by a pivoted connecting rod to a crankshaft or flywheel, thus converting reciprocating motion into rotation [points](#) the two electrical contacts that make or break the current flow in the distributor of an internal-combustion engine [radiator](#) the part of an aerial or transmission line that radiates electromagnetic waves [rear light or \(U.S. & Canad.\) taillight](#) a red light, usually one of a pair, attached to the rear of a motor vehicle [rear-view mirror](#) [reversing light](#) a light on the rear of a motor vehicle to warn others that the vehicle is being reversed [roof](#) any structure that covers an organ or

part [satnav](#) a system that uses information from satellites to find the best way of getting to a place. It is often found in cars [seat belt or safety beltshock absorber](#) any device designed to absorb mechanical shock, esp one fitted to a motor vehicle to damp the recoil of the suspension springs [silencer](#) any device designed to reduce noise, esp the tubular device containing baffle plates in the exhaust system of a motor vehicle [soft top](#) a convertible car with a roof made of fabric rather than metal [spare wheel](#) a wheel with a tyre on it that you keep in your car in case you get a flat tyre and need to replace one of your wheels [speedometersprocket](#) a relatively projecting radially from the rim, esp one that drives or is driven by a chain [starter](#) a internal-combustion engine, usually consisting of a powerful electric motor that engages [g column](#) (in a motor vehicle) the shaft on which a steering wheel is mounted and by h the steering gear [steering wheel](#) a wheel turned by the driver of a motor vehicle, ship, es to change direction. It is connected to the front wheels, rudder, etc [sump](#) a receptacle, the crankcase of an internal-combustion engine, into which liquids, esp lubricants, can [sunroof or sunshine roof](#) a panel, often translucent, that may be opened in the roof of a of springs, shock absorbers, etc, that supports the body of a wheeled or tracked vehicle cupants from shocks transmitted by the wheels [tailgate](#) a door at the rear of a hatchback m which the exhaust gases from an internal-combustion engine are discharged, esp the ust system of a motor vehicle [torsion bar](#) a metal bar acting as a torsional spring, esp as of some motor vehicles [towbar](#) (in cars) a method of preventing wheels from spinning oy limiting the amount of power supplied to the wheel traction control[transmission](#) a torque converters, etc, that transmits power, esp the arrangement of such parts that e engine to the driving wheels of a motor vehicle [trim](#) the upholstery and decorative anels, of a car's interior [tyre](#) a rubber ring placed over the rim of a wheel of a road n and reduce road shocks, esp a hollow inflated ring (pneumatic tyre) consisting of a nclosing an inner tube [universal jointwheel](#) a solid disc, or a circular rim joined to a hub okes, that is mounted on a shaft about which it can turn, as in vehicles and machines o loosen or tighten the nuts holding a vehicle's wheel in place [wheel nutwheel](#) rim over or around the wheels of a motor vehicle [windscreen](#) the sheet of flat or curved w of a motor vehicle, esp the front window [windscreen wiper](#) an electrically operated that wipes a windscreen clear of rain, snow, etc [wing](#) the part of a car body that [g mirror](#) a mirror on the wing of a car [wing nut](#) a threaded nut tightened by hand by wings projecting from the central body ▷ See [car](#)
